PROFESSIONAL EXPERIENCE

Software Developer|Smart Scrum AI|Dec 2019 - Present

- Implemented front end components utilizing React.js, Reactstrap, and Material-UI
- Created and deployed authorization using Node.js, Express, and Bcrypt
- Connected a functioning user database to the server and made the database accessible using Apollo GraphQL
- Assisted in creating machine learning and AI capabilities that increase team efficiency over time utilizing Python
- Participated in planning the design and functionality of the application

Event Technology Expert|Socio|Aug 2019 - Dec 2019

- Increased the amount of clients by leveraging LinkedIn and CRM software to create more efficient and targeted campaigns for the sales team
- Consistently grew personal sales numbers month over month by learning avidly and creating clear communication with coworkers in multiple departments
- Researched and recommended new software that increased calls made by 80 percent in one month leading to higher sales

Head Server|My Thai Cafe| Dec 2016 - May 2019

- Led a team of kitchen staff and other servers to attend to a heavy workload of 80 customers daily
- Trained and assisted in hiring ten staff members to use software, resolve customer complaints, and follow safety procedures while managing opening and closing duties such as reconciling the cash drawer

SPEA Serves Lead|Indiana University - SPEA|May 2017 - Dec 2018

- Advertised, organized, and implemented a volunteer program with over 65 members to address a lack of service in existing extracurricular activities and build positive relationships with outside organizations
- Collaborated with ten local nonprofits including Habitat for Humanity, the Community Kitchen, and the Shalom Center to fulfill their missions and provide over 250 volunteer hours

Human Resources Intern|City of Bloomington|Aug 2018 - Dec 2018

- Created and maintained a computer database of 800 employees to better understand salary distributions and implement the 2018 City of Bloomington salary ordinance with a new pay structure
- Reviewed 20 hiring decisions with hiring managers to ensure unbiased hiring decisions
- Developed outreach and training materials including visual media to improve hiring practices and three surveys on employee satisfaction in the workplace

PASSION PROJECTS

Rate My Flight

A website designed to help flight passengers communicate about their experiences in the hopes of creating positive changes in the airplane industry. This project was created using React.js, Node.js, Express.js, Postgres, and Sequelize. The website is deployed on Heroku and was tested using Postman and PGAdmin.

Song Finder

An application designed to be a simple way to reference some of the top songs made by favorite and unknown artists alike. This project was created using HTML, CSS, and Javascript. The website is deployed utilizing Firebase.
